

Student Ambassadors!

Are you under 35 and an energetic, social and passionate go-getter studying a BSc/MSc/PhD degree in biosciences? Join SANBio as a student ambassador for your country and help promote biosciences in the region!

What we offer:

Participation in events

Networking opportunities

Free training and travel in the region

Opportunities for career advancement

How to become a student ambassador:

Share your innovative and creative ideas and information on current happenings in biosciences in your country and the SADC region on any of our social media accounts.

The Southern Africa Network for Biosciences (SANBio) provides a shared research, development and innovation platform for working collaboratively to address some of the Southern Africa's key biosciences issues in health, nutrition and cross cutting areas in agriculture and environment. The BioFISA II programme, supported through a partnership between the Department of Science and Technology (DST) in South Africa, the Finnish Ministry for Foreign Affairs (MFA) and implementing partners, aims to strengthen the NEPAD/SANBio Network.
